Attn: Elizabeth Mason  
MBS Environmental  
4 Cook Street  
West Perth WA 6005

Dear Elizabeth,

### **REQUEST FOR THREATENED AND PRIORITY FAUNA INFORMATION**

I refer to your request of the 16<sup>th</sup> of August for information on threatened and priority fauna occurring within the vicinity of King Sound, Derby for an environmental impact assessment.

A search was undertaken for this area from the Department's threatened fauna databases, which include species that are declared as '*Rare or likely to become extinct (Schedule 1)*', '*Birds protected under an international agreement (Schedule 3)*', '*Other specially protected fauna (Schedule 4)*'.

Attached are the conditions and disclaimers under which this information has been supplied. Your attention is specifically drawn to the second point referring to the confidentiality levels associated with the supply of this information and the seventh point that refers to the requirement to undertake field investigations for an accurate determination of threatened fauna occurrence at a site. The information supplied should be regarded as an indication only of the threatened and priority fauna that may be present.

An invoice for \$300.00(plus GST), being the set charge for the supply of this information, will be forwarded.

It would be appreciated if any occurrences of threatened fauna encountered by you in the area could be reported to this Department to ensure their ongoing management.

If you require any further details, or wish to discuss threatened fauna management, please contact our Principal Zoologist on (08) 9219 9515.

Yours sincerely

.....  
**Georgina Anderson**  
Threatened Fauna Database Officer  
for the DIRECTOR GENERAL  
Department of Parks and Wildlife  
1 September 2016

## Attachment: Conditions of Supply

### THREATENED AND PRIORITY FAUNA INFORMATION

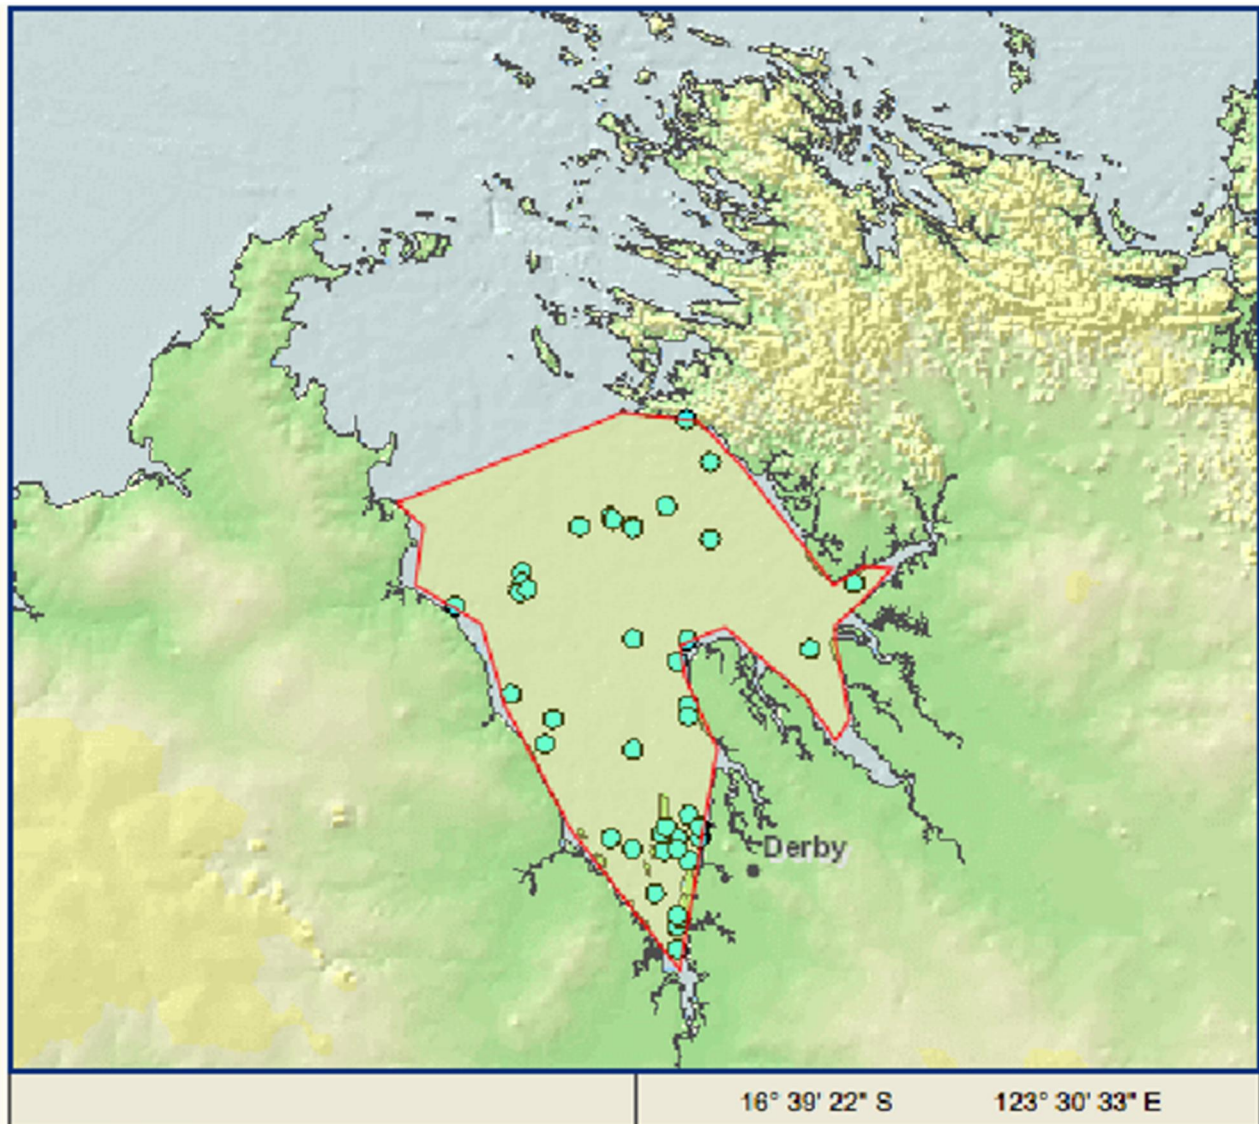

#### *Conditions with Respect to the Supply of Information*

- The data supplied may not be provided to any other organisations, nor be used for any purpose other than for the project for which it has been originally provided for; without the prior consent of the Executive Director, Department of Parks and Wildlife.
- Specific locality information for threatened fauna is regarded as confidential, and should be treated as such by receiving organisations. Specific locality information for threatened fauna may not be used in reports without the written permission of the Executive Director, Department of Parks and Wildlife. Reports may only show generalised locations at a low resolution or, where necessary, show specific locations without identifying species. Species and Communities Branch is to be contacted for guidance on the presentation of threatened fauna information.
- The Department of Parks and Wildlife respects the privacy of private landowners who may have threatened and priority fauna on their property. Threatened and priority fauna locations identified in the data as being on private property should be treated in confidence, and contact with property owners must only be made through the Department of Parks and Wildlife.
- Acknowledgment of the Department of Parks and Wildlife as the source of data is to be made in any published material and cited as Parks and Wildlife (2016) Threatened and Priority Fauna Database Search for [search area] accessed on the [date of search]. Prepared by the Species and Communities Branch for [Requesters name and company] for [purpose of search].
- Copies of all such publications are to be forwarded to the Department of Parks and Wildlife, Attention; Principal Zoologist, Species and Communities Branch.

#### *Disclaimers with Respect to the Supply of Information*

- Receiving organisations should note that while every effort has been made to prevent errors and omissions in the data, they may be present. The Department of Parks and Wildlife accepts no responsibility for this.
- Receiving organisations must also recognise that the database is subject to continual updating and amendment, and such considerations should be taken into account by the user.
- It should be noted that the supplied data does not necessarily represent a comprehensive listing of the threatened fauna of the area in question. Its comprehensiveness is dependent on the amount of surveys carried out within a specified area. The receiving organisation should consider engaging a biologist/zoologist, if required, to undertake a survey of the area under consideration.
